

Ready to Volunteer?

Join the more than 2,000 VRP-covered volunteers across Washington State providing much-needed healthcare to underserved patients. All healthcare providers with a Washington State active or retired active license, or providers licensed in the U.S. who wish to volunteer at a VRP-approved site in Washington State, are eligible. There is no minimum volunteer time commitment.

To volunteer, please contact an approved site or event to volunteer. A complete list of approved sites and all necessary forms are included on our website. Once approved by the site or event, fill out the appropriate application forms.

Are you interested in volunteering your skills as a healthcare provider? We need you! Join the network of licensed healthcare professionals that provide free care to patients left out of the healthcare system.

The Volunteer and Retired Providers Program (VRP) supports healthcare volunteerism in Washington State by paying malpractice insurance premiums for licensed healthcare volunteers providing care to underserved patients. The insurance is claims made and covers \$1,000,000 per incident, \$5,000,000 aggregate. Professionally employed healthcare providers with site-specific malpractice insurance coverage are eligible for this benefit.

Volunteers who use their Washington State professional license only for volunteer work are also eligible for license renewal. All professional license costs are covered (other than late fees and testing fees).

What's Covered?

The VRP Program provides coverage for non-invasive care.

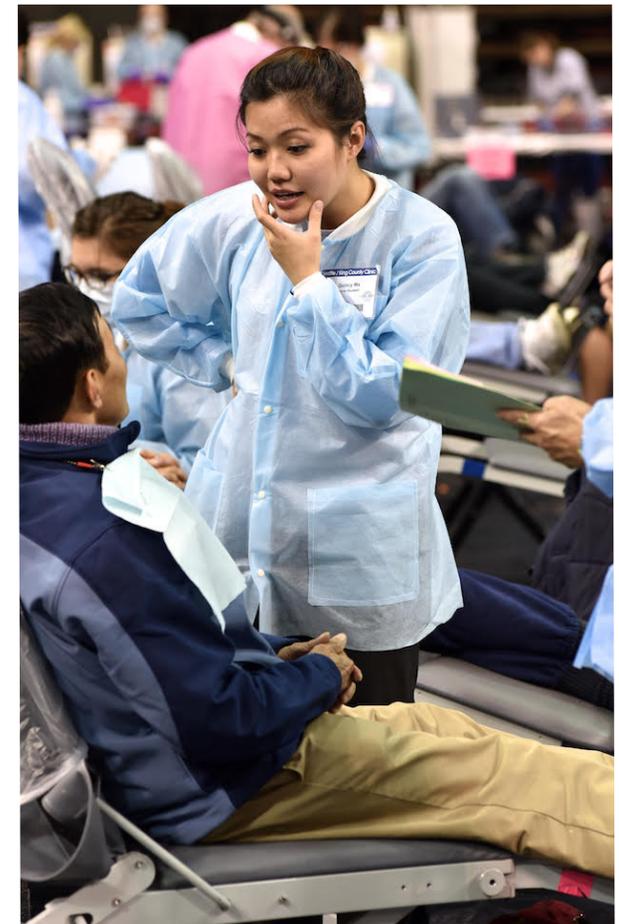

Non-invasive medical care includes the administration of injections, suturing of minor lacerations, and the incision of boils and superficial abscesses. Obstetric care and procedures coded as surgery are not covered under non-invasive medical care.

Non-invasive dental care includes diagnosis, oral hygiene, restoration and extraction. Orthodontia and surgical treatments are not covered by VRP malpractice insurance.

Out of State Volunteers

Out of state providers are also eligible to volunteer in Washington State! Even if you don't hold a Washington State credential, if you're licensed in another US jurisdiction, you can volunteer in Washington State up to 30 days per year.
